

NITIN DIXIT

Lead QA Engineer / SDET | Web, API & Mobile Automation

SUMMARY

Lead QA Engineer / SDET with 9 years of experience in web, API, and mobile test automation, currently in the banking and insurance domain. Expert in test framework development using Java, Selenium, Playwright, REST Assured, TestNG, Maven, Cucumber (BDD), and Page Object Model (POM). Built API automation frameworks from scratch with performance testing (load, stress, endurance), JaCoCo code coverage, and custom Chart.js trend reports. Skilled in Appium, Postman, and CI/CD with parameterized Jenkins and GitHub Actions pipelines, including automated qTest sync. Uses agentic AI tools (Kiro) to boost productivity, and guides QA teams to deliver high-quality releases on time.

EXPERIENCE

- Synechron** Feb 2025 – Present
Lead QA Engineer
 - Client: TransAmerica** Nov 2025 – Present
 - Identified and verified API test cases with the Product team, and organized test cases and test runs in qTest.
 - Built an API automation framework from scratch using Java, REST Assured, and BDD (Cucumber), with JaCoCo for code coverage.
 - Added performance testing (load, stress, and endurance) using concurrent REST Assured requests, with Chart.js trend reports.
 - Created parameterized Jenkins jobs for functional and performance runs, with automated email reporting (Extent and Chart.js).
 - Integrated the framework with qTest to auto-sync test cases, execution status, and failure logs.
 - Used Kiro agentic AI for coding assistance, increasing productivity by up to 60%.
 - Client: UBS** Feb 2025 – Oct 2025
 - Contributed to the design and enhancement of the Selenium WebDriver + Java automation framework, developing scalable and reusable test cases.
 - Authored and ran manual test cases using Squash, ensuring full functional coverage.
 - Built strong domain knowledge in banking processes, enabling accurate validation of business workflows.
 - Guided a 2-member QA team, fostering collaboration and improving delivery quality.
- Vegrow** Oct 2021 – Jan 2025
Senior QA Engineer
 - Built a Selenium WebDriver framework, reducing manual effort by 50% and strengthening overall test automation.
 - Embedded automated testing into CI/CD pipelines (Jenkins, GitHub Actions), boosting build and deployment efficiency by 40%.
 - Coached a 4-member QA team, improving productivity by 30% through training and task prioritization.
 - Expanded API automation coverage by 25%, authored QA documentation, and conducted RCA, reducing recurring defects by 40%.

EXPERTISE

Programming
Java, Python, JavaScript

UI Automation
Selenium WebDriver, Playwright

API Automation
REST API, REST Assured, Postman, Python Requests

Mobile Automation
Appium

Frameworks
TestNG, Maven, POM, BDD (Cucumber), TDD, LCC

Performance Testing
Load, Stress, Endurance

CI/CD & DevOps
Jenkins, GitHub Actions, Groovy, Docker, AWS S3

Reporting & Coverage
Extent, Allure, Chart.js, JaCoCo

Testing Types
Manual, Functional, Regression, UI & API Testing

QA Process
Test Case Design, Defect Management, RCA, Agile

Tools
qTest, JIRA, Confluence, Squash, Git, GitHub, Bitbucket

Other
Agentic AI (Kiro), Team Mentorship

● Dkatalis

Apr 2021 – Sep 2021

QA Engineer

- Analyzed requirements and designed test cases to identify usability and performance issues.
- Conducted exploratory testing to uncover issues in real time.
- Validated multi-device and cross-platform consistency, ensuring functionality across various devices and browsers.
- Compiled detailed reports, highlighting findings and recommending improvements.

● AgroStar

Sep 2017 – Mar 2021

SDET-1

- Led the design and creation of a testing framework, including developing test steps, maintaining the project, and deploying it to the Jenkins server for Continuous Testing (CT).
- Automated web (Selenium + Java), API (REST Assured, Postman), and mobile (Appium) test cases.
- Estimated testing efforts for CRM project (Salesforce App) user stories in JIRA and handled defect tracking.
- Built a test suite for features in different environments such as staging and pre-prod.
- Prioritized bugs based on severity and reported them to developers.
- Crafted, documented, and executed test scenarios.
- Carried out regression testing for every new build release.

ACHIEVEMENTS

- Rising Star Award at AgroStar, Sep 2018
- Extra Mile Award at AgroStar, Sep 2020
- Wow Service Award at Vegrow, Apr 2022

EDUCATION

Bachelor of Engineering in Computer Science

Jun 2013 – May 2016

Pune University, Maharashtra, India
